Summary

Information Science and Engineering graduate with strong foundations in software development, data analysis, and modern web technologies. Experienced in building real-time applications, working with datasets, and collaborating effectively in team environments. Seeking opportunities to apply technical skills, problem-solving abilities, and creativity to impactful engineering projects.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL, HTML, CSS

Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

AI/ML: Data Preprocessing, Feature Engineering, Model Training, Model Validation

Generative AI: LLMs, Prompt Engineering, RAG, LangChain, Fine-Tuning

Design: Figma, Canva

Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook, IntelliJ IDEA

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

Education

Alva's Institute of Engineering and Technology

Sep 2022 – May 2026

Bachelor of Engineering in Information Science and Engineering (CGPA: 8.47 / 10)

Karnataka, India

SDC PU College

2022

Pre-University (Percentage: 78.67%)

Karnataka, India

S T . A N N ' S High School

2020

SSLC / X (Percentage: 81.92%)

Karnataka, India

Experience

Data Science Intern

Feb 2026 – May 2026

Take It Smart (OPC) Pvt. Ltd. — Bengaluru

Remote

- Worked on Python-based data science and machine learning tasks.
- Performed data preprocessing and basic analysis on datasets.
- Built and tested basic machine learning models using Python libraries.

Projects

Apartment Visitors Management System | MERN Stack

- Developed a full-stack web application using React.js, Node.js, Express.js, and MongoDB.
- Implemented role-based login and real-time notifications to residents upon visitor arrival.

AI Chatbot for Mental Health | Python, Scikit-learn, NLP (TF-IDF, Logistic Regression)

- Designed an NLP pipeline using TF-IDF vectorization and Logistic Regression to detect user intent.
- Optimized preprocessing with tokenization, stopword removal, and lemmatization.
- Integrated into Flask interface with cross-validation.

Deep Learning for Early Detection of Diabetic Retinopathy | Python, PyTorch, OpenCV

- Built an AI system to classify retinal fundus images into 5 DR stages (0–4)
- Developed hybrid ResNet50 and Capsule Network model for feature extraction.
- Trained the model using transfer learning in PyTorch on a large dataset (7,500+ images), achieving 97.2% accuracy.

Certifications

- **Java Developer Certification-** Infosys Springboard –(May 2025)
- **Generative AI -** Jenny's Lectures (April 2026)
- **Data structures and Applications -** CodeChef (Feb 2024)

Achievements

- **2nd Runner Up, Technovare** — Achieved 2nd place in a college-level technical fest among 180+ teams and 400+ participants.
- **Hackathon Winner**— Recognized for developing an AI-based Mental Health Chatbot with practical deployment.
